

PH.D. THESIS

PUBLIC CONTROL OF PRIVATE ECONOMIC INITIATIVE

di Marco Santangeli

SUMMARY

The analysis carried out in the present paper deals with the topic of public control of private economic initiative.

The work is articulated in three chapters: the first chapter concerning the analysis of the freedom of enterprise and the corresponding limits imposed on it by the Constitution and European legislation; the second chapter deals with the administrative regimes adopted by the legislator to regulate private economic initiative and the new principles descending from the European Union legislation (the services directive); the last chapter concerning the applying of the aforesaid principles to three specific sectors of the Italian legal system (health, environment and trade).
